

small. Mighty. **POWERFUL** protection with Meshify Slim™.

Tiny device. Big peace of mind.

Introducing Meshify Slim™ — our most compact water and freeze sensor yet. Built with homeowners in mind, this small but mighty device harnesses the power of Amazon Sidewalk and our patent-pending Meshify Relay™ protocol to connect and protect homes against hidden water threats.

Smart tech. Real-time protection.

Meshify Slim is designed to detect water leaks and temperature changes that can lead to costly property and equipment damage. From ground water and sump pump backups to burst pipes and leaking appliances, Slim responds fast — helping homeowners act before small issues become expensive claims.

Low profile. High impact.

- Ultra-slim sensors fit under appliances and in tight spaces
- Sets up in less than three minutes — no tools or plumbers required
- 24/7 alert support — receive alerts from anywhere, anytime
- Offered at no cost for a limited time subject to availability

Detect leaks quickly. Reduce damage.

Protect what matters.

Talk to your Independent Agent to learn how Meshify Slim can bring smart protection into your home.

Why it matters

- **20% to 30%** of all property insurance claims are due to non-weather-related water damage¹¹
- Water leaks can go **undetected for two to four weeks without sensors** — causing significant loss

Protect homes from weather and non-weather water damage

- Burst, frozen, or leaking pipes
- Sump pump failures
- Basement leaks
- Ground water intrusion
- Toilets, sinks, bathtubs, and showers
- HVAC systems
- Roofing issues and clogged gutters
- Appliances - washing machines, dishwashers, and refrigerators
